93% - Recommend course to all students
41% - Require course for all students
55% - Recruited to career in primary care
PARTNERS
Patients and Researchers Together at NAPCRG Evaluating Research Studies
For that problem, most patients get most of their care in primary care.

That's not the way it works - or not the way it feels – in practice.

Do we have the right people sitting around the table for this discussion?

We all agree we're after what is best for the patients.
I don't know.
This little light of mine, I'm going to let it shine.

Let it shine.

Let it shine.

Let it shine.

Let it shine.
All around the world, 
We’re going to let it shine.

Let it shine.
Let it shine.
Let it shine.

X3
Thank You
